

RJ45 Boot

These RJ45 boots are engineered to provide robust protection for RJ45 connectors, safeguarding against physical damage, strain, and wear during installation and operation.

The flexible, form-fitting design helps maintain signal integrity by preventing accidental disconnections and stress-related failures.

Compatible with Cat 5e, Cat 6 UTP, and Cat 6a standard cables. They can also be used with Cat 5e and Cat 6 FTP, as well as Cat 6a solid core cables.

Features & Benefits

- Shields RJ45 connectors from mechanical damage and wear
- Minimises cable strain to reduce risk of signal loss or failure
- Flexible and secure fit for improved installation durability
- Suitable for use in data centres, structured cabling systems, and telecoms environments
- Available in a wide range of colours for easy cable identification: Black, Blue, Grey, Green, Orange, Pink, Red, Violet, White, Yellow

Product Specifications	
Material	PVC
Size (mm)	6.5
