Stainless Steel

CL460

Narrow Stile Codelock

The CL460 mechanical narrow stile lock is a reliable and cost-effective alternative to electronic keypads, electric strikes, and magnetic locks.

Designed specifically for aluminium-framed doors, it's ideal for both new installations and retrofit projects. This medium-duty mechanical lock is compatible with Adams Rite or similar ANSI round cylinder mortice deadlatches. For added convenience, deadlatches are also available from Codelocks. With versatile access control options, the lock allows you to manage entry using a key, code, or code-free mode - offering flexibility to suit your access management needs. Choose the CL400 Narrow Stile Lock for a practical and affordable solution for aluminium door access control.

ADDITIONAL FEATURES

Code Change Method

Requires removal of the lock from the door. The code can be changed by repositioning the tumblers in the code chamber. Locks are supplied with a random code commencing with the 'C' clear button.

Code Free Access

The CL465 and CL475 models provide a Code Free Access mode. These models feature a black dot on the 'Y' button. When the 'Y' button is pressed along with a correct code input, the lever will retract the latch freely until disabled. To reset press the 'Y' button followed by the 'C' button.

Extra-Long' Fixing Kit

An optional kit is available for doors between 55mm to 70mm, including longer fixing bolts, spindles, and pin plates.

Easy to install
