# CL600

## Quick Code Access

The CL600 range offers heavy-duty mechanical locks with the convenience of on-the-door code changes, eliminating the need to remove the lock for reprogramming.

With QuickCode functionality, codes can be updated in seconds—saving time and simplifying access management. This makes the CL600 an excellent choice for commercial settings such as hospitals, schools, and local authorities where frequent code changes are required. Designed for flexibility, the CL600 provides multiple entry options, allowing access by code, key, or code free mode via full-size lever handles.

### FEATURES

- Full size lever handles with return to door
- Suitable for wooden doors 35mm - 60mm thick
- PVD low maintenance finish
- Locks can be supplied keyed alike on request
- Two part 8mm ( $\frac{5}{16}$ ") spring loaded spindle
- Ball knob handle option

- 8,191 code combinations
- Suitable for internal and external use
- Medium duty latch with 'anti-shim' plunger
- Euro profile mortice sash deadbolt or latchbolt
- Large three coil lever return spring for high traffic use
- Locks will fit doors hung on the left or right
- Compatible with PINGuard™ XT3 weather cover
- CodeLocks tubular lock/latch component CE-certified
- CodeLocks FireKit Packs can be fitted to latch for 30 or 60 minute timber doorsets - Tested in accordance with BS EN 1634-1

### LOCK MODELS

#### Front and Back Plates

Front and back plates only. Use with existing tubular mortice latch or lock. Existing lock must have a fixing hole 22mm ( $\frac{7}{8}$ ") below follower (spindle).

#### Tubular Mortice Latch

Medium duty tubular mortice latch with 'anti-shim' plunger. Latch retracts by turning inside handle freely, or the outside handle after code input.

#### Back to Back Option (BB)

Medium duty tubular mortice latch. Two coded plates for installation on both sides of the door. Provides coded access in both directions.

#### Mortice Lock

Euro profile mortice sash lock with deadbolt and latchbolt. With the deadbolt thrown it denies access to code users. Supplied with euro profile cylinder and three keys.

## ADDITIONAL FEATURES

### Code Free Access

The CL615 models provide a Code Free option. The outside lever will retract the latch freely until disabled.

### Panic Kit Option

An extra long spindle is provided to work with most single point panic pads or bars.

### Split Follower

The CL620 Mortise Lock model utilises a split follower as a safety feature. This enables the inside lever to retract the deadbolt and latchbolt, after the deadbolt has been thrown, to prevent an accidental lock in.

### Marine Grade

Selected CL600 models are also available in a black, marine grade finish. Salt spray test up to 1000 hours.

### Code Change Method

QuickCode allows on the door code changes in seconds!
