KL1000 RFID Smart Card Access

The KL1000 RFID is a simple, smart card KitLock providing codeless and keyless access to lockers, cabinets, cupboards and enclosures.

The KL1000 RFID KitLock offers functions for single users, Private Function, and short term use by multiple users, Public Function. The KL1000 RFID can be easily fitted to replace an existing cam lock, or to fit to a new locker or cabinet that does not have an existing locking device. The lock will perform up to 15,000 openings on just two AAA batteries.

FEATURES

- MIFARE® compatible
- Master User Card
- Technician Card
- Public Pairing Feature⁶
- Up to 15,000 operations (2 x AAA batteries supplied)
- Battery override
- Red LED will flash on opening to indicate low battery
- Ready to fit doors up to 25mm (1")
- Easy to install and program
- Slam latch accessory available
- All parts / fixings / templates included
- IP55 rated when fitted with gasket (available separately)
- RFID cards, fobs, and wristbands (available separately)

FUNCTIONS

Private Function

This is intended for use where there is a single user. Up to 50 individual MIFARE® cards can be registered on the lock and only those registered cards can continue to unlock that lock. The Master Card is used to open a lock, register a new User Card and remove a User Card. The Technician Card is not available in this function. Dedicated and existing MIFARE® cards can be used, no need to purchase new smart cards.

Public Function

Suitable for short term use by different users. Touch a MIFARE® smart card to lock the lock and then use the same card to unlock the lock, leaving the lock in that unlocked state for any other compatible card to be used. Pre-registration of the card is not required and any new or existing MIFARE® card, fob or wristband can be used. Suitable for use in short-term multi-occupancy applications such as leisure centres, spas and hotels.

Card Management

Master Card

The Master Card is used to open the lock and delete the currently in-use User Card. The lock will return to an unlocked state.

Technician Card

The Technician Card is used to open the lock and retain the currently in use User Card. The lock will return to a locked state.

Public Pairing Feature⁶

The Public Pairing Feature prevents the same card from locking multiple locks that are operating in Public Function.

Easy to install
