Havannah Primary School case study

The challenge:

The school were previously using paper hand towels as the method of drying the hands after visiting the washroom. They decided to replace these with energy efficient hand dryers to save money on the expense of paper towels, reduce waste and keep the toilet areas tidier.

The results:

Estimated annual cost to use old paper towel cost: £3,510 (based on 0.6p per paper towel)

Estimated annual cost to use new hand dryers: £68.25 - £156.98 (based on 14p per kW/h)

Annual cost savings: £3,353.02 - £3,441.75

Estimated return on investment period:
Payback period: approx. 0.22 years

We have drastically reduced our hygiene budget spends AND our carbon footprint! We have eliminated all excess waste paper and the whole toilet area feels much more hygienic and remains far tidier.
