

Dryflow
JetDri
MK II

RECOMMENDED TRAFFIC:

<100 uses a day

GUARANTEE PERIOD:

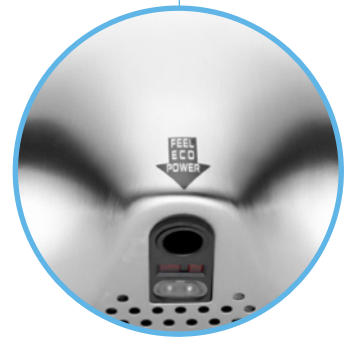

3 years

Low energy

Fast drying

Fast drying, solid and energy efficient

User drying perception: amazes and astounds

One of the fastest budget hand dryers available

Robust with quality manufacture; suitable for tough environments

Heater element can be turned on or off – maximising energy efficiency

Very low annual running costs

A very popular design

Specification

Dry Time Range	10 – 15 Seconds	
Rated Power	0.55 – 1.8 kW	
Cost per 1000 dries	29p – 84p	
Finishes and Codes	White (IFS-IMP200W) Brushed Satin (IFS-IMP200BS)	
IP rating	IPX1	
Dimensions	Height	320mm
	Width	290mm
	Depth	170mm

Benefits

Unbelievable drying times

There's nothing worse than not being able to fully dry your hands when using a dryer. This blasts water from the hands in seconds, creating a soft ripple of the skin as it does it. No one's ever disappointed as it quickly completes the job it's supposed to do, each and every time.

A build quality that belies its price tag

The curvaceous shape of this unit has stood the test of time and is a really popular addition seen in many a washroom. Lower price sometimes means lower value. Not with this. If you need to limit the budget but don't want to save on drying capabilities, this unit is for you. For added peace of mind this comes with an extended guarantee.

Create comfort when required

In the colder months, the last thing people want is a shot of cold air on their hands. In low traffic washrooms, where this is best suited, an internal heater switch allows for instant heat. When the warmer days come you can switch off the heater element to maximise low running costs. Ideal for keeping money in your pocket by minimising annual running costs.

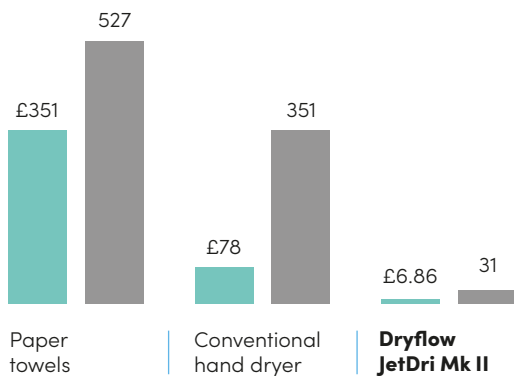

Made for tough settings

If a location is prone to the odd unsavoury character, equipment needs to be resilient to keep in service. A thick, high-grade stainless-steel cover, securely fastened by 2 anti-vandal screws, makes sure this hand dryer is robust.

Help to reduce your carbon footprint

You will be massively contributing to improving the planet as this unit has a very low carbon production. When compared to paper towels or conventional hand dryers, this has minimal negative impact on the environment.

Annual cost and carbon production (Kg/CO²) for an office of 20 people*
