Price Changes

Throughout the course of 2022, we, along with many others in the industry have seen significant increases in supplier costs across all facets of our product portfolio, primarily due to the combined effects of high inflation, supply side constraints and increased energy costs.

TDSi as a company has been doing all it can throughout 2022 to mitigate and minimise these cost increases wherever possible, however it has been necessary to increase our costs in areas where these increases have become impossible to absorb.

GARDiS Bluetooth Low Energy

Add mobile credentials to your GARDiS Access Control system with our GARDiS Bluetooth Low Energy Readers, available in Mullion and Square formats - check out page 6 of the Price List for more information.
