

CL5000 NetCode® Electronic Lock Range

Codelocks proudly presents the CL5000 NetCode® range.

With the original CL5000 having stood strong since its launch in 2004, the CL5000 NetCode® is an evolution of a time-tested classic.

The addition of Codelocks NetCode® Technology unlocks added benefits of temporary, time-sensitive access codes that provide an increased level of control. Enjoy the flexibility and convenience of remote access, granting entry from afar via the Codelocks Connect Portal.

Beyond the technology, the lock's core strengths - its solid build, ease of installation and operation, key override and low maintenance - remain steadfast. Powered by batteries, its operation is hassle-free, eliminating complex wiring. Customers can be confident that whilst offering enhanced NetCode® capabilities, the reliability and durability of the well-known CL5000 that made it a bestseller is retained.

Enabling NetCode®

To enable NetCode® function, the lock requires initialisation via the Codelocks Connect Portal. Visit codelocksconnect.net and complete the following steps:

- 1 Sign in or create a Codelocks Connect Portal account
- 2 Add your lock and follow the initialisation steps

With NetCode® function enabled, generate your first NetCode® on the Codelocks Connect Portal and share it via email or SMS³.

For detailed instructions on enabling and using NetCode®, see full CL5000 NetCode® Programming and Operating Instructions at codelockssupport.com
