

5331A

Electric strike

Application:

Offer true fail safe function. For use where a high security and vandal resistance must be balanced with the need for safety. For example, high rise residential accommodation, multiple occupancy office buildings, and elderly persons units where quick evacuation and access for the emergency services may be necessary.

Supplied fitted with either faceplate 13, 16, 24 or 823, secured with anti-vandal screws.

Body, faceplate and pivoting staple are manufactured from high grade steel.

Tested to 1,000,000 operations.

HIGH strength - resists 750kg sidepressure on the pivoting staple.

Can be used with both left and right hand doors without adjustment.

Specification:

DC continuous duty fail safe with built-in microswitch

The strike is closed as long as the current is on and opens automatically when the current is switched off.

A microswitch monitors the latchbolt engagement.

Will open even when a sidepressure up to 500kg is applied.
