Over the sink touch  
free hand hygiene  
environmentally friendly

Dryflow Wash & Dry solutions save water and soap, reduce energy consumption and eliminate the need for paper towel.

They're good for the environment, good for the user and good for business.

Dryflow Wash & Dry solutions allow architects, interior decorators and designers to keep a clutter-free and clean look throughout the washroom by eliminating soap dispensers and hand dryers on the walls and bringing them onto the wash basin.

Deck-mounted or wall-mounted Dryflow Wash & Dry solutions improve the hand-drying process because all waste water goes into the sink and not onto the floor, keeping a more hygienic and clean washroom and at the same time avoiding slips, a common cause of accidents.

Dryflow Wash & Dry solutions allow you to spend less time in the washroom because each user has a wash and dry unit at the same wash basin.

# Dryflow Wash & Dry Series

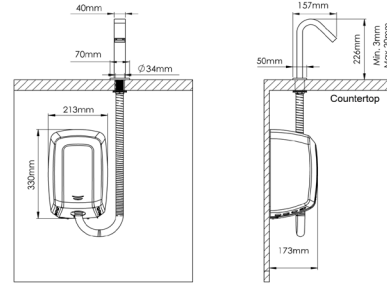

## Dryflow Bi-Tap

IFSM092A-ANON

### Sensor hand dryer

Dries hands in 15 seconds with a highly efficient air flow and minimum electrical consumption.

IFSGAJ002A-ANON

### Sensor tap

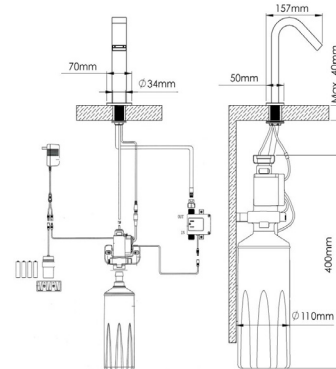

The motion sensor allows a touch-free operation, preventing cross-contamination when washing hands and a much more efficient use of water.

### Sensor soap dispenser

The non-drip valve prevents messy drips and avoids unnecessary waste. Adjustable, it delivers a perfect amount of soap.

Full set code:  
IFSUCM092A-ANON

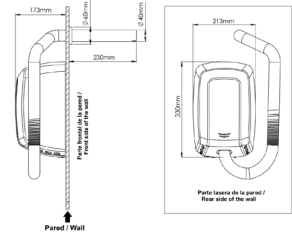

## Dryflow Tri-Tap

### Sensor hand dryer.

Dries hands in 15 seconds with a very comfortable airflow and with a minimum electrical consumption.

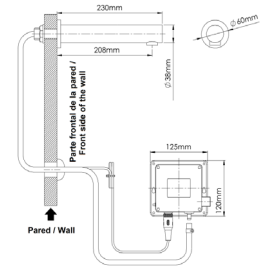

IFSM093A-ANON

### Sensor tap,

WRAS certified, reduces overall water usage, avoids its misuse and undue consumption and minimises the contamination of the water supply.

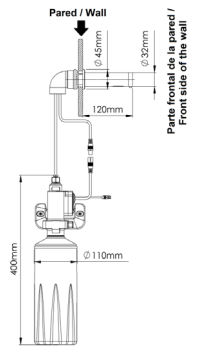

IFSGA003AC-ANON

### Sensor soap dispenser.

Fully automatic touch free soap dispenser, efficient and able to consistently dispense soap accurately. Its anti-drip valve prevents messy drips.

IFSDJ003AC-ANON
