

## The CAME remote control

- Four button rolling code transmitter
- Self-learning from transmitter to transmitter.
- Self-learning from TOP, TAM and TWIN series radio controls.
- More secure thanks to the dynamic code
- It can be configured remotely via gateway or locally via CAME KEY.

## Dimensions (mm)

## Operational limits

|                         |            |
|-------------------------|------------|
| MODELS                  | 806TS-0270 |
| Max. range of radio (m) | 50 ÷ 150   |

## Technical characteristics

|                              |                  |
|------------------------------|------------------|
| MODELS                       | 806TS-0270       |
| Combinations                 | 4.294.967.896    |
| Radio signal frequency (Mhz) | 433,92           |
| Battery type                 | 1 CR2032 Lithium |
| Operating temperature (°C)   | -20 ÷ +55        |
| Material                     | Polycarbonate    |
