

**ANT290A****90° DUAL-POLE ANTENNA, 5GHZ**

Antenna with a symmetrical beam at 90° with gain: 9.6 dB. Equipped with N-female connectors, Frequency 5180 - 6400 MHz, bandwidth -6 dB: H 90° / V 90°, mechanical tilt:  $\pm 25^\circ$ , pole mounting diameter: 30 - 80 mm.

## ANT290A

### 90° DUAL-POLE ANTENNA, 5GHZ

#### MAIN FEATURES

|                           |            |
|---------------------------|------------|
| Antenna gain (dBi) (dB)   | 10         |
| Operating frequency (GHz) | 5.18 ÷ 6.4 |

#### GENERAL DATA

|                             |                                                       |
|-----------------------------|-------------------------------------------------------|
| Depth (mm)                  | 312                                                   |
| Diameter (mm)               | 152                                                   |
| Product weight (g)          | 1800                                                  |
| Type of finishing materials | Aluminium, Polycarbonate, Stainless steel, Zinc alloy |
| Product color               | Red, White                                            |
| Operating temperature (°C)  | -30 ÷ 55                                              |
