

The AR02 is a single reed flush contact designed for use in steel doors. The operating gap is approx. 24mm – but this may be affected if mounted in non-ferrous materials.

INSTALLATION

Drill a 35mm deep, 20mm diameter hole in the door frame for the contact.
Drill a 45mm deep, 20mm diameter hole in the door for the magnet.

Connect the reed/alarm wires to the terminals provided.

Push-fit the complete contact into doorframe and magnet into door.
Packing/adhesive may be used where recess diameters are oversized.

NOTES

The reed is rated 100V/400mA max AC/DC
