

Datasheet

MOBILE CREDENTIAL/ KRYPTO Mobile-PASS

Product description

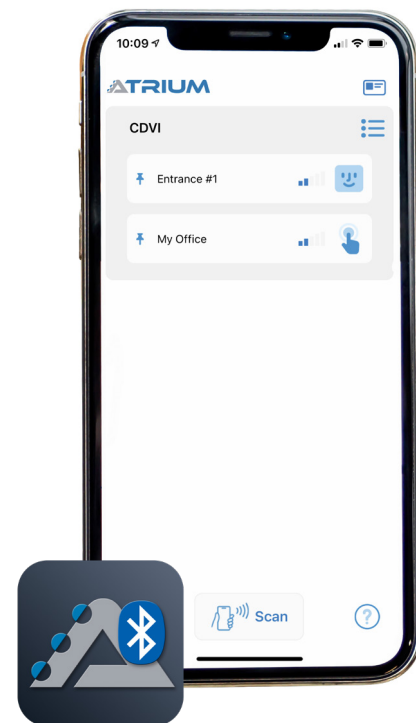

The KRYPTO Mobile-PASS is a mobile credential that can be assigned to any user of the ATRIUM system who wants to use their smartphone as an access card.

Combined with CDVI's high-security KRYPTO controllers and Bluetooth readers, this mobile credential solution offers end to end encryption. Components needed for a complete solution include:

- ATRIUM A22K controller
- KRYPTO Bluetooth reader
- ATRIUM BT application

Key features

- 5 ways to unlock a door: Scan, Touch, Automatic, Voice and Biometric
- Use your smartphone as a credential
- 5 free Mobile-PASS per site
- Free ATRIUM BT app
- No yearly fees / no cloud required

Product Specifications

ATRIUM BT App: Available for free in the Apple or Google Play store

AMC25 License: Contains 25 mobile credentials that can be added into the ATRIUM system

3 steps to be ready to unlock doors with your phone !

1 Activate the AMC25 license in ATRIUM webserver or software.
