

Datasheet

RTE-EX - Green Dome Request to Exit Button

Product Description

This hard-wearing exit button is ideal for use in outdoor settings and for heavy duty usage.

It features a high-impact green dome made of zinc alloy and a square back box to make installations quick and easy.

With an SPDT switch, this button allows you to trigger two different devices at the same time – for example, to release a lock and switch on a light.

Key Features

- Square shape exit trigger device
- Green dome activation button
- Surface mount
- Suitable for outdoor installations
- 2 signal output contacts
- Ideal for use in harsh environments
