

Protective Cage

CG100

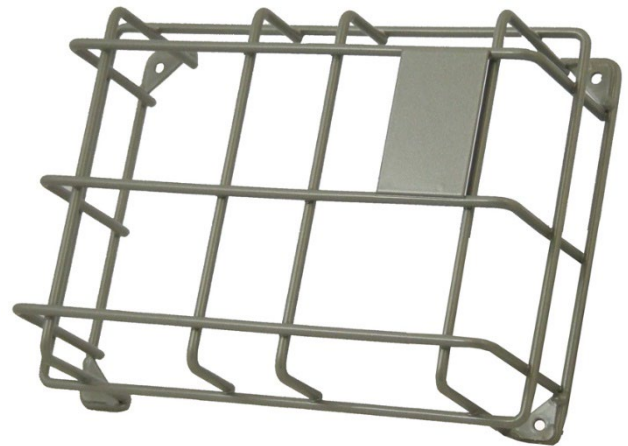

Constructed from 9 gauge galvanised steel rod, this powder coated cage is purpose designed for the protection of our Exitguard, Dorwatcher, Zoneguard, Aidalarm and Stop n Search models from vandalism and misuse. The cage has openings to allow for normal operation of the units.

You will require 4 x no.8 screws suitable for the wall construction you wish to fix the cage to.

Cages for other applications available on request.
