

The D50 is a single reed surface contact in changeover configuration (Form C). The operating gap is approx. 20mm – but this may be affected if mounted near ferrous materials.

INSTALLATION

Connect one wire to T4 Common. Connect the second wire to T1 NC or T2 NO depending on the desired operation. Use the spare unconnected brass terminals (T3 & T5) for any additional wiring required.

Fix the magnet to the door and the contact to the frame using the fixings provided. Ensure both halves align correctly for best operation.

NOTES

The reed is rated 500mA max AC, 500mA max DC
