

DPM (300, 400 & 500)

Door position monitoring

CDVI Group Products

Range : DiAx®

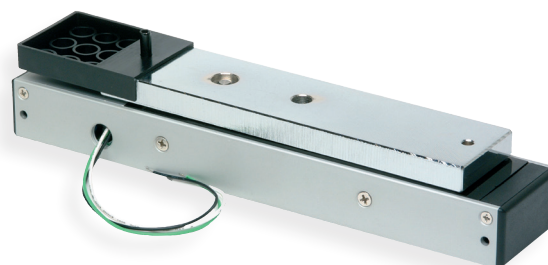

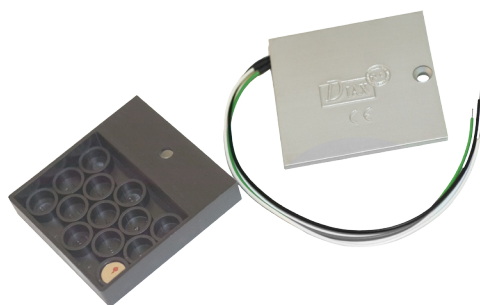

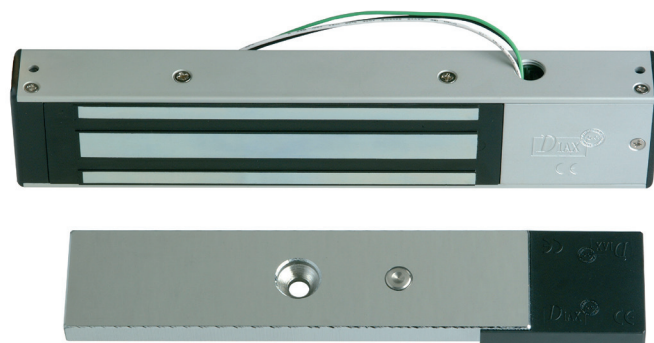

The range of Door Position Monitors from CDVI offers additional monitoring to surface mount magnetic locks.

Being retrofit, new and existing magnets can now be fitted with the DPM to provide monitoring of the door status. A changeover contact gives flexible signalling options which include being used for auto-relock on some access control systems.

All of the 300kg, 400kg and 500kg internal surface magnets from CDVI can be fitted with the DPM, this is a quick and easy install which will include a benefit to users who require door monitoring but do not want to cut a traditional door contact into the frame and door leaf.

The DPM is supplied with a replacement cover to the magnetic lock, and a simple bolt-on extension to the armature plate - install is completed in minutes.

Product codes

DPM300	DPM for 300kg surface magnets
DPM400	DPM for 400kg surface magnets
DPM500	DPM for 500kg surface magnets

Key features
