# Third-Party Devices Accessed via Plug-in

## Introduction

HikCentral Professional supports third party devices via the integration of Open Network Video Interface protocol.

You need to install a separated plug-in application to support the device model as follows. Through the plug-in installation package, it can increase the third party equipment and extend the functionality of the third party equipment without reinstalling the HikCentral Professional.

**Note:**

1. Before installing the plug-in, please exit the Service Manager of HikCentral Professional.

If you deploy the SYS service and Streaming Server on the same hardware, you need to install the plug-in on the same hardware server; if you deploy them separately, you need also install the plug-in on each hardware server.

## Third-Party Devices Supporting Open Network Video Interface

**Note:**

1. "NA" means the device supports the function but it's not tested or failed to pass the test.
2. "-" means the device doesn't support the function.
3. The live view function is tested via Web Client and Control Client.
4. The playback function is tested via Hybrid SAN for HikCentral Professional.
