and washrooms since 2012.**

# PRESTIGE PRST01 SENSOR TAP

FLOW RATE

5.7 lpm  
at 3 bar

POWER SOURCE

4 x 1.5 AA  
Alkaline batteries

SAFETY CUT OUT

70 seconds

INFRA-RED SENSOR ACTIVATION

ADJUSTABLE SENSOR DISTANCE

TIMEOUT PROTECTION ( 70S AUTO CUT OFF )

BRASS WITH CHROME PLATED FINISH

|                               |                                                             |
|-------------------------------|-------------------------------------------------------------|
| Operation                     | Battery (4 X 1.5 AA Alkaline batteries (6V) *not included*) |
| Opening/ Closing time         | Open <1s; Close <1.5s                                       |
| Flow Rate at 3 bar            | 5.7 lpm                                                     |
| Type of Water Mixing          | Cold or premixed via Thermostatic Mixer                     |
| Max Water Temperature         | 75 °C                                                       |
| Connector                     | 1/2"                                                        |
| Mounting                      | Deck mounted                                                |
| Minimum/Maximum Flow Pressure | 0.5bar / 8bar                                               |
| Sensor Distance               | 220 - 280 mm (Adjustable)                                   |
| Safety Cut off Time           | 70 seconds                                                  |
| Dimensions                    | 140mm (H) x 158mm (D) x 50mm (W)                            |
| Materials                     | Brass with Chrome Plated Finish                             |
| Finishes Available & Codes    | Chrome (PRST01)                                             |
| IP Rating                     | IPX7                                                        |
