RW1300-010	REACH AV Base Cap - WT
RW1300-020	REACH AV Base Cap - RD
RW1300-060	REACH AV Base Cap - BK

Range Description

The ORB-BA-10008-APO Series 65 to Orbis Base Adaptor and the ORB-BA-50008-APO Orbis I.S. Adaptor are retrofit accessories designed to simplify upgrading existing Apollo conventional fire detection systems. They allow modern Orbis or Orbis I.S. detector heads to be installed directly onto legacy Series 65 or Series 60 I.S. bases, enabling system modernisation with minimal disruption and without the need for rewiring.

The RW1300-010/020/060 REACH AV Base Cap is a practical accessory for REACH AV Base installations where a detector is not fitted. It provides a neat, protective finish to the base and maintains system aesthetics during staged installations or when a detector position is intentionally left vacant. Available in multiple colours to match installation requirements.

Key Features (ORB)*

- Enables Orbis detectors to fit existing Series 65 bases
- Enables Orbis I.S. detectors to fit existing Series 60 I.S. bases
- Eliminates the need for rewiring
- Supports cost-effective system upgrades
- Minimises installation time and disruption

Key Features (RW)*

- Designed for REACH AV Base products
- Allows AV base installation without a detector
- Provides clean, finished appearance
- Protects exposed base connections
- Available in white, red, and black

*Features vary by base. Refer to individual product information at www.apollo-fire.co.uk for full details.
