

Orbis Bases

Range Part Numbers

ORB-DB-00003-APO	Orbis TimeSaver Base - Diode
ORB-MB-00001-APO	Orbis TimeSaver Base - Continuity Switch
ORB-MB-00012-APO	Orbis Base - LX
ORB-MB-00019-APO	Orbis TimeSaver Base - Deep
ORB-OP-02032-APO	Orbis Optical Smoke Detector (Non-Latching)
ORB-RB-10004-APO	Orbis TimeSaver Base - Relay
ORB-SW-10005-APO	Orbis Base - Sav-Wire

Range Description

The Orbis range of mounting bases has been designed to simplify installation, commissioning, and maintenance across a wide variety of fire detection applications. All bases provide secure detector mounting with intuitive alignment and locking features, while selected variants offer additional functionality such as active end-of-line monitoring, relay outputs, deep enclosures for surface wiring, or compatibility with Sav-Wire systems.

The consistent TimeSaver design philosophy delivers generous working space, grouped terminals, and practical installer aids to ensure fast, reliable fitting and servicing.

Key Features*

- Grouped terminals for straightforward wiring
- Two fixing centres for fast mounting
- LED alignment mark for correct detector orientation
- Active end-of-line monitoring capability
- Integral diode for head-removal monitoring systems
- Single-pole voltage-free changeover relay contact
- Switching capacity up to 30 V DC at 1 A
- Increased depth option for side cable entry / surface wiring
- Compatibility with Sav-Wire detection and alarm systems

*Features vary by base. Refer to individual product information at www.apollo-fire.co.uk for full details.
