

Integrated Access Control Solutions

KeyPAC is PAC's new reading technology which offers an increased reading range. It is a low cost solution with all the benefits of PAC.

As an alternative to the traditional mechanical key, PAC's proximity ID devices are used by millions of people as an easy and reliable means of gaining access to their places of work and other secured access points e.g. carpark barriers and turnstiles.

Reasons to choose KeyPAC ISO Cards:

- Provides a secure working environment
- Simple to use, strong and flexible
- Unique identity code
- Can be easily deleted from the access control system (without the physical presence of the ID card)
- Ideal for direct image printing
- No batteries required
- Carries a lifetime guarantee against electronic failure

KeyPAC ISO Card

Features

The KeyPAC ISO card is manufactured from white ABS plastic making it both strong and flexible. It requires no batteries and offers a range of 1 billion codes. The KeyPAC ISO card is also ideal for direct image printing and can easily be vertically slot punched. It is an excellent low cost proximity access control solution.

The KeyPAC ISO card can be placed into a specially designed card holder attached to a clip or neck chain or can be easily carried in a purse or wallet. It offers a lifetime guarantee against electronic failure.
