

# Ruijie Wireless Bridge Setup Instructions

Please follow the below instructions when installing Ruijie Wireless Bridges to ensure that they are setup correctly.

1. Connect both units to their respective PoE Injectors and connect one injector to the Network.
2. Wait for both units to power up and connect, this will be indicated by solid green lights on the Wireless frequency indicators on the side.
3. Using the Ruijie Cloud App, create an account and log into your account.
4. Create a Project and scan the QR Code of the Bridge unit connected to the network.
5. Follow onscreen instructions and create a Management Password and Project Name when prompted.
6. Follow onscreen instructions and when prompted, ensure that your Region is set to the United Kingdom
7. Once saved, the Project will prompt you to update the Bridge Connection Password. Ensure this is set to something secure and save.
