

The New Open-Area Audio Visual Devices (OAAV) Range

Our **Intelligent OAAV devices** provide significantly enhanced performance and functionality, **designed to meet any onsite challenges** and be the range of choice when safeguarding commercial properties, industrial facilities or public spaces.

SEAMLESS INSTALL AND SETUP

Simple first-fix with our XPert bases.

Volume adjustment directly at the device location.

BACKWARDS COMPATIBLE

They work across all Apollo protocols providing smooth integration with new and retrofit applications.

LOUDER THAN EVER

They are significantly louder than previous generations propelling our OAAV offering to the next level.

With seven volume levels you can reduce the current draw in areas where the required volume level is lower, whilst staying compliant.
