

Radio Controls

Transmitters

Range : Erone®

A complete range of radio control and switching products to provide wire-free control of gates, barriers, doors, lights etc. A high quality, high performance range manufactured by Elpro Innotek, a CDVI Group company.

The full range of hand-held transmitters have the option of fixed or rolling code technology - rolling code increases the security of the transmitted signal by changing constantly. The hand-held transmitters are available as 1, 2 or 4-button with the option of an integral prox tag for multi-technology access control.

Our fixed transmitters include a wall mount switch, a 22-code keypad which can operate up to 6 different receiver channels, a touch-sensitive switch, an external heavy-duty button and a small adaptive transmitter to convert traditional switches to radio.

Each product is battery powered, with the ability for the user to change the battery when necessary - the exception to this is the external heavy-duty button which is mains powered.

Adaptable transmitter can be fitted into a variety of switching devices

Technical specifications

Frequency:	433.92MHz
Modulation:	ASK
Encoding:	Fixed (TX39E2/E4) Keeloq hopping code
Range:	Up to 200 metres
Dimensions:	83 x 48 x 16mm (TX39E2/E4) 83 x 48 x 16mm (TX26E1/E2/E4) 60 x 36 x 16mm (TX26AM1/AM2) 80 x 80 x 25mm (TX26-TM) 67 x 82 x 66mm (TSW2641E1) 145 x 78 x 32mm (DIGIKEY) 90 x 60 x 25mm (FKT2641E1)

Key features

- Full range of hand-held & fixed
- Rolling code & fixed code options
- Integral prox option (hand-helds)
- Wire-free applications
- Up to 200 metres range
- Cost-effective switching
- Internal and external use
- 2 year warranty
