Single Gang Surface Interface Plate, deep (25mm)

Part No. NCP-24

Overview

- Allows standard UK single gang plated products to be fixed to most European style back boxes (square and round variants).
- Adapts to most European fixing centres - see video for further details.
- Multiple variants available - options include single gang shallow (NCP23), single gang deep (NCP24), double gang shallow (NCP25) and double gang deep (NCP26).
- Designed to match C-TEC's existing plastics and colours.
- Tough and durable.
- Can also be surface mounted directly to a wall.

CE
