3.5" 6200 SERIES

4000 SERIES

4000 Series "True" two wire bus videokits available with coded access or proximity access control.

VIDEOKIT

2 WIRE BUS VIDEO

CODED ACCESS

PROXIMITY ACCESS

The 4000 series range of "true" two wire bus colour videokits are available as flush or surface kits with optional coded access (ESVKC) or proximity access control (ESVKX). The videokits are available with either a mirror stainless steel or a matt 316 marine grade stainless steel finish with a gun metal grey surround front support frame in a flush or surface back box. The kits also include different videophone options including either a 6200 series (3.5" videophone), 6300 series (3.5" hands-free), 6400 series (4.3" hands-free) or 6700 series (7" hands-free) 2 wire bus videophone.

Installations couldn't be easier thanks to the common 2 wire bus using two non-polarity wires. The videokits are ideal for small scale "one to one" installations or low-rise apartment blocks (up to 12 apartments max.), but can also be expanded up to 8 entrances (max.) where additional 2301N multiple entrance switchers are required.

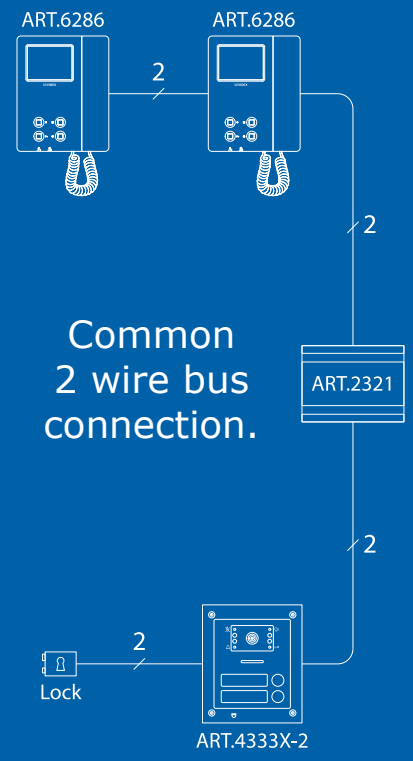

Key features of the kits include: an integrated high quality day/night colour camera with 4 illumination LED's and auto iris lens (wide angle camera optional) and includes an external camera input. DDA compliant call progress LED's (busy, call, speak and door open) with reassurance tones, privacy feature, built-in lock relay with capacitor discharge output option, camera recall function, microphone, speaker and balance adjustments and an intercommunication facility between videophones in different apartments or between videophone extensions within the same apartment.

The proximity access control feature (for the ESVKX kits only) is able to support up to 50 programmable users using either the standard Videx 955/T proximity fobs or the 955/C proximity cards.
