10-Meter Detection Distance

## Dual-band Wi-Fi connection boost

---

No more struggles to get your doorbell stably connected. You can switch between 2.4 and 5 GHz frequency bands to ensure that the DB1 Pro runs with a stronger wireless signal and delivers faster alerts.

## Built for any weather

---

It's a doorbell that you can set and forget. Rainy, snowy or stormy, the DB1 Pro is here to deliver steady performance.

## Answer your door, at home or away

Whenever a visitor presses your doorbell, you will receive a video call on your phone. See, hear and talk clearly, so the person knows if it's a good time to visit.

## Save on storage space and ease network loads

The doorbell features the advanced H.265 video compression technology, achieving same video quality while reducing the required bandwidth and storage space by up to 50%<sup>2</sup>.

## We protect your data and privacy

Your data security and privacy is the cornerstone of every product we design. Data activities between the device and the EZVIZ Cloud are encrypted from end to end. Only you have the keys to decrypt your data.

AES 128-bit encryption

TLS encryption protocol

Multi-step authentication

1. The local storage card needs to be purchased separately.
2. When the 24/7 recording mode is applied, the H.265 technology can reduce the video storage space and bandwidth by 50% as compared to H.264.
3. The cloud storage service is only available in certain markets. Please verify availability before making a purchase.
