Smart Wifi Radiator Valve with Display Screen

For the ultimate choice of modern home technology, our smart radiator valve allows you to customize your heating and save money in the process. With room by room temperature settings, you can heat only the areas that you need, ensuring your bedroom is warm for when you arrive home after an evening out. This helps you to cut down on your bills as no heat is wasted. The valve connects to your home Wi-Fi and can be voice controlled or remotely accessed. This means you can connect and control your heating from anywhere. The white finish blends perfectly with contemporary décor and will suit any radiator.

Features:

- The motor adopts ultra-quiet technology to minimize noise pollution. It can control valve faster and more accurate.
- 4 direction display, 360° viewing angle.
- ENERJSMART APP remote control, with temperature statistics chart, user can check the temperature more intuitive.
- Intelligent PID algorithm, efficient control of valve opening and closing.
- The device supports Wi-Fi fast distribution network, no additional gateway is required.
- Automatic debugging function, equipped with 6 kinds of adapters, suitable for all kinds of mainstream valves.
- OLED display, Weekly-programmable with 6 events can be set separately for each day.
- Voice control via Amazon Alexa and Google Assistant.

Smart Wifi Radiator Valve with Display Screen

Accessories Details

Valve types	pictures	adapters	Valve types	pictures	adapters
